With synoptic winds steady, boosted by a daily thermic breeze, the bay of Brest delivers summer averages of 12 to 18 knots — ideal for high-performance sailing.

BOATS

Around ten Half Tonners sail and race at the tip of Finistère, and they are fully committed to the HTCC27 – Brest project. We expect to welcome 40 boats for this edition.

RACES

Five days of racing, combining windward–leeward , coastal races, and why not an offshore leg. All options will be explored to elevate the experience.

HOSPITALITY

A dedicated space for the sailors will be set up, to host meetings, provide a relaxed area to unwind, and offer a friendly place to enjoy a drink together.

ACTIVITIES & ENTERTAINMENT

Rowing-challenge “godille” contests, radio-controlled sailing races to bring crews together, and a wide range of nearby activities to help participants discover Brest.

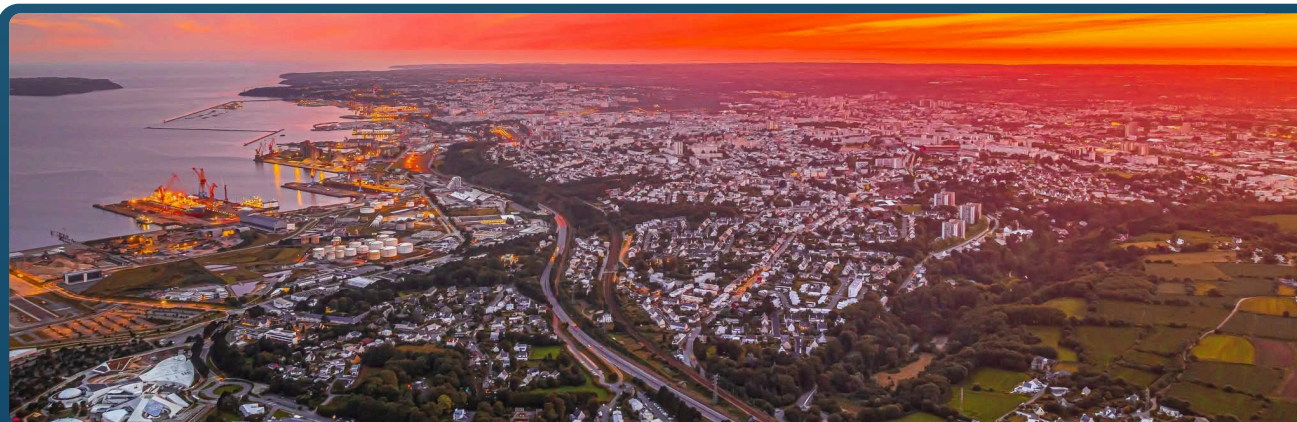

An event designed by passionate racers, for racers, to showcase this exceptional racing playground.
